Profile

Passionate about **unlocking strategic insights from data**, I have worked on a variety of projects, covering all stages of the data lifecycle: **extraction, transformation, cleaning, analysis, and visualization**.
With expertise in **Python, R, SQL, and Power BI**, I develop **innovative, automated solutions** that enhance decision-making and drive business performance.
Constantly eager to explore **new technologies and analytical methods**, I am currently seeking **a new opportunity** where I can leverage my skills to support a forward-thinking, data-driven organization.

Professional Experience

06/2024 – 11/2024
Luxembourg

Freelance Data Scientist
Siyalux

- Analyzed sales data to identify the most popular models based on regions and time periods.
- Forecasted future trends using time series models.
- Developed a dynamic pricing model based on vehicle characteristics, local demand, and seasonality.
- Studied factors influencing resale prices to maximize profit margins.

12/2022 – 05/2023
Luxembourg

Data Science Intern
Eurobank Private Bank

- Applied machine learning techniques to build a predictive model for product types (Foreign Exchanges, Securities Trades, Loans, and Deposits).
- Created SSIS packages to load data from the core banking system to the data warehouse.
- Developed reports using extracted data for business needs.
- Consolidated data across different reports.

09/2020 – 09/2021
Casablanca, Morocco

Junior Developer
Valsesia

- Assisted in the development and maintenance of the company's internal stock and order tracking system using Python and Excel automation.
- Created small scripts to automate repetitive tasks such as daily sales reporting and data entry.
- Gained hands-on experience in debugging, testing, and improving existing code under the supervision of a senior developer.

Education

03/2023
Paris, France

Applied MSc in Data Science and Artificial Intelligence
DataScienceTech Institute

07/2020
Esch-sur-Alzette, Luxembourg

Master's Degree in Computer Science, Specialization in Artificial Intelligence
University of Luxembourg

07/2017
Paris, France

Bachelor's Degree in Mathematics and Computer Science Applied to Social Sciences (MIAGE)
Université Paris Nanterre

Skills

- Python
- SQL
- C
- Microsoft Power BI
- Machine Learning (ML)
- Github
- SQL Server Integration Services (SSIS)
- SQL Server Reporting Services (SSRS)

Projects

Master thesis Project,
End of studies project
Thesis project: "Machine learning -based object situation awareness using a monocular camera for the autonomous navigation of multirotor aerial robots in populated areas" Development of a situation awareness system based on images produced by a monocular camera using different computer vision tools such as algorithms for object detection, image segmentation and depth estimation.

Other Projects

- Several projects on time series and duration data using Python and R (e.g :Web Scraper of Job Posting Website using Selenium, Classifcation...) available on Github .
- Various projects in statistical modeling and machine learning including forecasting models for time series (ARIMA, neural networks), Random Forests, survival analysis models, Bayesian probabilistic evaluation models, and the use of Netlogo for creating multi-agent models (agent-based models).

Languages

- English
- French
- Spanish
- Arabic

Certifications

- Pyhton for Data Science and Machine learning Bootcamp (Udemy)
- Power BI A-Z: Hands-On Power BI Training For Data Science (Udemy)
- Supervised Machine Learning: Regression and Classification(Coursera)
- Amazon AWS Cloud Computing (In progress)
- Neo4j Certified Professional

Areas of Expertise

Numpy | Scikit-learn | Pandas | Hadoop/Spark | Neural network | LLM | Natural language Processing (NLP) | Time Series Forecasting | Data Visualization | Statistical Modeling | Predictive Modeling | Problem Solving

Interests

- Football
- Esports
- Travel & Cross-Cultural Exploration
